DEMO-10 Directional Valve

Demo (fixture data, not a real product)

DEMO-10 4/3 directional valve, solenoid operated, closed centre

Mounting: ISO 4401-05 (CETOP 5) subplate mounting

Maximum operating pressure: 315 bar (ports P, A, B)

Maximum flow: 120 l/min

Ports

P pressure supply from the pump

T return to tank

A working port A, to the actuator

B working port B, to the actuator

Symbol

Three switching positions, drawn left to right:

Left position (solenoid a energised): P -> A and B -> T

Centre position (rest): P, T, A and B all blocked

Right position (solenoid b energised): P -> B and A -> T

Actuation: a solenoid and a centring spring on each end.

DEMO-10 Ordering code

DEMO-10 - 4 - 3 - C - voltage

4 = four ports, 3 = three positions, C = closed centre

Part numbers

Ordering code	Coil voltage	Connector
DEMO-10-4-3-C-24DC	24 V DC	EN 175301-803
DEMO-10-4-3-C-230AC	230 V AC	EN 175301-803

Seals: NBR as standard.

Fixture document for software tests. Not a real product.
